

Overview

- Questions to guide CBPR Workshop during April CoP
 - Have you participated in a CBPR project?
 - Have you taken any training in CBPR?
- Brief survey on demographics and equity practices
- Finish conversations on implementation of *Educare Network's Research Agenda: Advancing Racial Equity*, principles 10 & 11

April CoP Guest Speaker: Dr. Kristin Black

Dr. Black, PhD, MPH, is an Assistant Professor with a joint appointment in the Departments of Maternal and Child Health and Health Behavior. She is **committed to utilizing community-based participatory research, mixed methods, and racial equity approaches** to understand and address inequities in reproductive health and chronic disease outcomes. Her research merges 3 key components. First, Dr. Black explores the connections between reproductive health, maternal health, and chronic diseases, and if these outcomes differ by race/ethnicity or other social identities. Second, she focuses on understanding what individual- and systems-level factors may hinder or facilitate birthing people's journey through maternal healthcare services. Third, **she is committed to transforming research into action by engaging community stakeholders in implementing and sustaining interventions that tackle health inequities and structural racism.**

Brief Demographic & Equity Practices Survey

Conversation Guiding Questions

- What have we already done to address this principle?
- What could we do going forward?
- What do we need to learn? Invest in?
- How will we know if we've been successful/what are our accountability processes or metrics?

Principle 10

Understand, acknowledge, and address individuals' positionality and bias in designing, conducting, interpreting, and disseminating research. Examine influence and biases of funders and Network member and partner organizations in the activities and processes of research to push for a stronger equity lens in their role.

Principle 11

Leverage channels and mechanisms for communicating and disseminating research findings in ways that are accessible and readily reach those individuals, programs, and communities that are the focus of the research.
